Cetrexidin Plus

CETREXIDIN PLUS rappresenta per i professionisti del settore odontoiatrico una valida soluzione operativa, sostenuta da ampia letteratura scientifica, che si esplica attraverso:

- 1. SPECIFICA AZIONE ANTIBATTERICA:** grazie alla clorexidina digluconato nel dosaggio potenziato dello 0,3%.
- 2. ELEVATA AZIONE DETERGENTE** dovuta principalmente alla cetrimide che è risultata, a seguito di accurate sperimentazioni e test operativi, molto efficace nel rimuovere lo smear layer. La cetrimide agisce anche in modo sinergico con la clorexidina per incrementarne l'efficacia.
- 3. GRADEVOLEZZA del TRATTAMENTO di IRRIGAZIONE,** legata alla fresca profumazione mentolata.
- 4. ASSENZA DI CITOTOSSICITÀ.** Se spinto accidentalmente fuori apice, CETREXIDIN PLUS non è citotossico.

INDICAZIONI:

utilizzare una siringa monouso, ago a punta smussata.

Cod. P015

Confezione da 50 ml con sottotappo forato, in cartone da 12 flaconi
